SUMMARY

Final-year BSc Data Science and Analytics student at Jain University with hands-on experience in data analysis, machine learning, business intelligence, and data visualization. Proficient in Python, SQL, Power BI, Tableau, and Excel for data cleaning, exploratory data analysis, predictive modeling, and dashboard development. Completed a Data Scientist internship where I worked with sales and customer datasets to generate actionable business insights. Seeking an entry-level Data Analyst or Business Intelligence role to apply analytical skills and contribute to data-driven decision-making.

TECHNICAL SKILLS

- Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R, C++
- Data Visualization & BI: Power BI, Tableau, Excel, Dashboard Development, KPI Reporting
- Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering, Deep Learning (CNN, TensorFlow)
- Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub
- Databases: MySQL
- Core Competencies: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analytics, Business Intelligence, Data Visualization
- Automation: Excel VBA, Macros

EXPERIENCE

Ozenfx, Bangalore

July 2025 – August 2025

Data Scientist Intern

- Analyzed sales and customer interaction data to identify conversion trends and user behavior patterns
- Built machine learning models to improve lead prioritization and business forecasting
- Contributed to development of a real-time business intelligence dashboard for decision-making
- Performed data cleaning, preprocessing, and validation to improve data quality and model performance
- Collaborated with developers to integrate analytical outputs into a web-based analytics platform

PROJECTS

Sales Data Analysis & Predictive Modeling

- Performed end-to-end analysis of customer and sales data to identify key drivers of conversions
- Built predictive models to support data-driven business strategies and decision-making

Tomato Leaf Disease Classification Using Deep Learning

- Developed a Convolutional Neural Network (CNN) using TensorFlow achieving 96% classification accuracy.
- Applied image preprocessing, augmentation, and model evaluation techniques.
- Automated disease detection from leaf images to support agricultural monitoring.

github.com-mohammedshibilpa

Sleep Health Analytics Using Python

- Analyzed 400+ records across 13 variables using Python.
- Performed statistical analysis and correlation studies on sleep quality indicators.
- Identified a 30% relationship between stress levels and sleep quality.

- Created visualizations and reports to communicate findings effectively.

EDUCATION

Bachelor of Science (BSc) in Data Science and Analytics

Jain University (2023 – 2026)

Relevant Coursework: Machine Learning, Data Mining, Statistics, Data Visualization, Database Management Systems, Deep Learning

CERTIFICATIONS

- IBM – Excel Basics for Data Analysis
- Microsoft – Data Analysis and Visualization with Power BI
- University of Colorado Boulder – Data Wrangling
- Macquarie University – Data Visualization
